Control Reconfiguration of Dynamical Systems Linear

November 5th, 2018 - Fault tolerant control concerns the operation of the system after a fault has occurred Unlike the classical control theory where the behaviour of the system is completely defined fault tolerant control has to deal with situations where the system has been damaged

Control Reconfiguration of Dynamical Systems Linear

October 27th, 2018 - Reconfiguration an approach for fault tolerant control involves changing the control structure in response to the fault This monograph extends this idea to actuator faults and studies in detail the so called virtual actuator approach Control Reconfiguration of Dynamical Systems also introduces structural analysis as a tool for reconfiguration
