What Makes Biology Unique Considerations on the Autonomy

November 5th, 2018 - The major issues that are analyzed in the essays concern the autonomy of biology as a scientific discipline separate from physics and chemistry Most philosophers of science have tried to impose upon biology the conceptual framework of the strictly physical sciences and have thereby according to Mayr failed to make any significant contributions to the field

What Makes Biology Unique Considerations on the Autonomy

November 11th, 2018 - biology is a science exactly like any of the physical sciences but there is much evidence to question this assumption This raises the troubling question of whether one should not choose a different approach for the construction of a philosophy of biology from the one hitherto traditional in the philosophy of science

What Makes Biology Unique Considerations on the Autonomy

November 14th, 2018 - What Makes Biology Unique Considerations on the Autonomy of a Scientific Discipline This collection of revised and new essays argues that biology is an autonomous science rather than a branch of the physical sciences Ernst Mayr widely considered the most eminent evolutionary biologist
